

# ESET NOD32 Antivirus 5

Essential Internet security that is easy on you and your system

## Feature Highlights

- ✓ Antispyware
- ✓ Anti-rootkit
- ✓ Cloud-Enhanced Whitelisting
- ✓ Removable Media Control
- ✓ Host Intrusion Prevention System (HIPS)
- ✓ Internet Security Training
- ✓ Gamer Mode
- ✓ Small System Footprint

Looking for extended features like Firewall, Antispam and Parental Control? Try ESET Smart Security 5

# ESET NOD32 Antivirus 5 Features

-  **Antivirus** eliminates Windows, Mac and Linux viruses, worms, trojans, rootkits and other malware.
-  **Removable Media Control** prevents malware infection from USB flash drives, CDs and DVDs; enables blocking by device ID.
-  **Gamer Mode** suspends pop-up notifications, scanning and scheduled tasks while playing.
-  **Cloud-Enhanced Whitelisting** enables faster, more accurate malware detection.
-  **Smart Detection** identifies viruses and cyber threats that conventional signature-based antivirus products don't catch with heuristic ThreatSense® technology.
-  **Host-Based Intrusion Prevention System (HIPS)** blocks unauthorized changes to programs.
-  **SysInspector** is a powerful diagnostic tool for in-depth analysis of the operating system, including running processes, registry content, startup items and network connections.
-  **SysRescue** helps you to create a bootable disk of ESET NOD32 Antivirus 5 so you can scan and clean an infected system and reboot afterwards.
-  **Uninstall Password Protection** prevents unauthorized removal of ESET NOD32 Antivirus 5.
-  **Graphs and Statistics** enables you to monitor network communication (uploads/downloads), disk operations, as well as virus and antispam statistics.
-  **Internet Security Training** teaches you tips and techniques to make your online experience even safer.
-  **Antirootkit** detects and removes malware that hides from the operating system.

# Why ESET?

- ✓ **Protecting over 100 million users.**
- ✓ **Presence in more than 180 countries worldwide.**
- ✓ **Over 20 years of pioneering the computer security industry.**

## West Coast Labs certification

ESET holds Checkmark certifications in both detection and removal of infections.

## Virus Bulletin VB100 awards

ESET NOD32 holds the world record for Virus Bulletin VB100 Awards, never having missed detecting an "In-the-Wild" worm or virus.

## ICSA Labs certification

ESET is the first and only company in the world with ICSA certification for both Windows OS and Mac OS X.

## AV Comparatives awards

ESET has more Advanced+ awards in retrospective tests than any other antivirus vendor.

## Eliminate Internet threats proactively

Intercept and eliminate viruses, worms, trojans, spyware and other Internet threats with our award-winning heuristic technology. ESET NOD32® Antivirus 5 protects you from known and emerging threats when competing products can't and keeps your system running fast. Get ESET NOD32 Antivirus 5 for advanced security.

## Engage enhanced Gamer Mode

Activate Gamer Mode and ESET NOD32 Antivirus 5 automatically suspends pop-up notifications, scanning, and scheduled tasks if a program is run in full-screen.

## Conserve your laptop battery

The automatic energy-sipping feature conserves power by postponing scheduled tasks when your laptop is running on battery power.

## Surf safer with our complimentary security training

Installing security software is the first step toward cybersecurity. The second is educating yourself about safe Internet practices. That's why ESET Cybersecurity Training is complimentary with ESET NOD32 Antivirus 5. ESET Cybersecurity Training uses real-world cyber crime scenarios and gives you essential safety tips to make your online experience even safer.

## Share confidently

Not all computer threats come through the Internet; Removable Media Control protects you from potentially infected files exchanged through USB flash drives, CDs and DVDs.

## Accelerate your safety

Our cloud-enhanced whitelisting engine processes your files faster and more precisely by comparing your data to trusted files compiled in our ESET Live Grid™ database of over 100 million ESET users.

## Customize with powerful management tools

ESET SysInspector delivers a powerful diagnostic tool for in-depth analysis of the operating system, including system registry, running processes, startup items and network connections. The Host Intrusion Prevention System (HIPS) allows you to customize the behavior of the whole system and each of its parts, with the option to define rules for system registry, processes, applications and files.

## Refresh your online experience

With one of the smallest program file sizes of any Internet security software, a more intuitive interface and a smarter alert system, we offer a simpler, more easily managed digital experience for you.
